Contents

Foreword: New Music and Science  xi
John Chowning

Preface to the Second Edition  xv

Acknowledgments  xxi

Preface to the Original Edition  xxiii

I  Digital Audio  1

1  History of Digital Audio  3

2  Basics of Sound Signals  13

3  Theory of Sampling  23
   Curtis Roads with John M. Strawn

4  Sample Quantization, Conversion, and Audio Formats  39

II  Introduction to Sound Synthesis  55

5  History of Digital Sound Synthesis  57

6  Wavetable Lookup Synthesis  65

7  Time-Varying Waveform Synthesis  73

8  Software Synthesis  77
III  Sound Synthesis 93

9  Sampling 95
10  Additive Synthesis 115
11  Multiple Wavetable Synthesis 143
12  Wave Terrain Synthesis 151
13  Granular Synthesis 161
14  Subtractive Synthesis 187
15  Modulation I: RM, SSM, and AM 221
16  Modulation II: FM, PM, PD, and GM 241
17  Waveshaping Synthesis 273
18  Physical Modeling Synthesis 285
19  Virtual Analog 327
20  Formant Synthesis 345
21  Pulsar Synthesis 365
22  Waveform Segment Synthesis 389
23  Concatenative Synthesis 401
   Bob L. T. Sturm with Curtis Roads
24  Graphic Sound Synthesis 413
25  Noise, Chaotic, and Stochastic Synthesis 427

IV  Mixing and Signal Processing 443

26  Sound Mixing 445
27  Dynamic Range Processing 469
28  Digital Filtering 483
   Bob L. T. Sturm with Curtis Roads
Contents

29 Convolution 511
  Curtis Roads with Bob L. T. Sturm
30 Time Delay Effects 531
31 Pitch-Time Changing 543
32 Sound Spatialization 559
33 Reverberation 603

V Sound Analysis 631

34 Pitch Estimation 633
35 Rhythm Recognition and Automatic Transcription 661
36 Introduction to Spectrum Analysis 681
37 Spectrum Analysis by Fourier Methods 701
38 Spectrum Analysis by Alternative Methods 739
39 Spectrum Analysis by Atomic Decomposition 769
  Bob L. T. Sturm

VI The Musician’s Interface 783

40 Musical Input Devices 785
41 Interactive Performance Software 825
42 Sequence Editors 857
43 Sound Editors, DAWs, and Audio Middleware 873
44 Spectrum Editors 889
45 Common Music Notation Editors 907
46 Unconventional Score Editors 929
47 Instrument and Patch Editors 947
48 Languages for Sound Synthesis 963
Contents

49 Languages for Composition 983

50 Algorithmic Composition 995

VII Interconnections 1029

51 MIDI 1031

52 Open Sound Control 1077
   Curtis Roads and Matthew J. Wright

Appendix A: Machine Learning 1087
   Bob L. T. Sturm with Curtis Roads
