Contents

Preface xiii

I LOGIC AND EQUATIONS

1 Computer Systems: Simple Principles Lead to Complex Behavior 3
1.1 Hardware and Software 3
1.2 Structure of a Program 5
1.3 Deep Blue and Inductive Definitions 9
Exercises 12

2 Boolean Formulas and Equations 15
2.1 Reasoning with Equations 15
Exercises 18
2.2 Boolean Equations 19
Exercises 26
2.3 Boolean Formulas 27
Exercises 32
2.4 Digital Circuits 33
Exercises 36
2.5 Deduction 37
Exercises 49
2.6 Predicates and Quantifiers 51
Exercises 54
2.7 Reasoning with Quantified Predicates 55
Exercises 62
2.8 Boolean Models 63
Exercises 68

2.9 More General Models with Predicates and Quantifiers 68

3 Software Testing and Prefix Notation 71

Exercises 76

4 Mathematical Induction 79

4.1 Lists as Mathematical Objects 79

Exercises 84

4.2 Mathematical Induction 85

Exercises 91

4.3 Defun: Defining Operators in ACL2 92

4.4 Concatenation, Prefixes, and Suffixes 93

Exercises 99

5 Mechanized Logic 101

5.1 ACL2 Theorems and Proofs 102

5.2 Using Books of Proven Theorems 103

Exercises 104

5.3 Theorems with Constraints 105

Exercises 107

5.4 Helping Mechanized Logic Find Its Way 107

Exercises 111

5.5 Proof Automation and Things That Can't Be Done 112

Exercises 119

II COMPUTER ARITHMETIC

6 Binary Numerals 123

6.1 Numbers and Numerals 123

Exercises 128

6.2 Numbers from Numerals 129

Exercises 133

6.3 Binary Numerals 134

Exercises 135

7 Adders 139

7.1 Adding Numerals 139

Exercises 140

7.2 Circuits for Adding One-Bit Binary Numerals 140

7.3 Circuit for Adding Two-Bit Binary Numerals 143
Exercises 145
7.4 Adding *w*-Bit Binary Numerals 145
Exercises 148
7.5 Numerals for Negative Numbers 150
Exercises 153

8 Multipliers and Bignum Arithmetic 157
8.1 Bignum Adder 158
Exercises 161
8.2 Shift-and-Add Multiplier 161
Exercises 165

III ALGORITHMS

9 Multiplexers and Demultiplexers 169
9.1 Multiplexer 169
Exercises 172
9.2 Demultiplexer 173
Exercises 175

10 Sorting 177
10.1 Insertion-Sort 178
Exercises 180
10.2 Order-Preserving Merge 182
Exercises 183
10.3 Merge-Sort 184
Exercises 185
10.4 Analysis of Sorting Algorithms 186
10.4.1 Counting Computation Steps 186
Exercises 188
10.4.2 Computation Steps in Demultiplex 189
Exercises 190
10.4.3 Computation Steps in Merge 191
Exercises 192
10.4.4 Computation Steps in Merge-Sort 192
Exercises 194
10.4.5 Computation Steps in Insertion-Sort 196

Exercises 199

11 Search Trees 201
11.1 Finding Things 201
11.2 The AVL Solution 203
11.3 Representing Search Trees 206
11.4 Ordered Search Trees 207
Exercises 208
11.5 Balanced Search Trees 208
Exercises 210
11.6 Inserting a New Item in a Search Tree 210
Exercises 212
11.7 Insertion, Case by Case 212
Exercises 217
11.8 Double Rotations 218
Exercises 222
11.9 Fast Insertion 223
Exercises 225

12 Hash Tables 227
12.1 Lists and Arrays 227
12.2 Hash Operators 229
Exercises 234
12.3 Some Applications 236

IV COMPUTATION IN PRACTICE

13 Sharding with Facebook 243
13.1 The Technical Challenge 243
13.2 Stopgap Remedies 245
13.2.1 Caching 245
13.2.2 Sharding 246
13.3 The Cassandra Solution 247
13.4 Summary 249

14 Parallel Computation with MapReduce 251
14.1 Vertical and Horizontal Scaling 251
14.2 The MapReduce Strategy 252
14.3 Data Mining with MapReduce 256

14.4 Summary 261

15 Generating Art with Computers 263

15.1 Representing Images in a Computer 263

15.2 Generating Images Randomly 266

15.3 Generating Purposeful Images 270

Index 273
