

Contents

The book is divided into four parts. The chapters within each part build on each other, but the parts can be read and taught in any order.

The parts proceed from the micro to the macro. Part I starts within your own brain and how it perceives data. Part II focuses on how to optimize an individual graph. Part III moves out to the structure and organization of an effective communication. Finally, Part IV ends with strategies to present data well and deal with the ultimate complexity: other people's responses.

Introduction	1
Who this book is for.....	1
What makes this book different.....	1
How this book is organized.....	2
PART I	
Understanding Perception	
<i>How and why graphs work</i>	7
Chapter 1	
Know Your Own Mind (in order to change others').....	8
Understand the challenges of communicating data	10
Shift your mindset to explain data to others.....	16
Chapter 2	
See How Graphs Work (inside your brain)	20
How we decode graphs	22
How graphs encode data	28
Exercise: Break down the graphs	41
PART II	
Designing Your Data	
<i>How to design effective graphs and slides</i>	45
Chapter 3	
Choose the Right Graph (for your data)	46
Pick the graph based on the relationship.....	48
Use taxonomies to expand your library of graph types.....	71
Exercise: Categorize the relationships	73

Chapter 4	
Simplify to Amplify (your message)	78
Maximize the data–ink ratio	80
Make the most important information the most salient	86
Exercise: Redraw the graph	98

Chapter 5	
Build Effective Slides (with the point in mind)	100
Identify a single point for each slide	102
Write your point as a headline.....	102
Use headlines to clarify your graphs	106
Test your slides to maximize clarity and impact.....	109
Exercise: Sketch the right slide for this headline	121

PART III

Organizing Your Data

<i>How to arrange data into compelling communications</i>	125
--	-----

Chapter 6	
Structure Your Data (so others can follow it)	126
Begin with your ending in mind	128
Structure your communication with a Minto pyramid	129
Synthesize your key points into a single main idea	133
Maximize the impact of your points	138
Support your points with sound reasoning	145
Convert your Minto pyramid into a complete communication.....	150
Exercise: Making the case at Craigstone—Part I.....	157

Chapter 7	
Frame the Data to Persuade (so the audience acts)	160
Audiences evaluate more than just the data	162
Understand how audiences evaluate your ideas	162
Maximize the likelihood of central processing with the WIIFT.....	165
Use story to create a compelling context	173
Take advantage of peripheral processing signals	177
Exercise: Making the case at Craigstone—Part II	184

PART IV

Delivering and Defending Your Data

How to prepare for and respond to your audience 189

Chapter 8

Present Your Data (with less preparation) 190

 Give your data a voice 192

 Master each component of the TOP-T framework 193

 Practice some advanced techniques 202

 Exercise: Practice presenting 205

Chapter 9

Prepare for Resistance (because resistance shows they care) 210

 Resistance can be productive 212

 Resistance can be predicted 213

 Resistance can be anticipated with the Audience Confusion Matrix 216

 Resistance can be defused 226

 Exercise: What type of scenario is it? 230

Acknowledgments 236

Bibliography 239
