

Contents

Preface	ix
Acknowledgments	xvii
1 Sentential Logic: Basic Concepts and a Formal Language	1
1.1 Basic Logical Notions	1
1.2 Elements of a Formal Language	3
1.3 Well-Formed Formulas	5
1.4 Translation of English to Sentential Wffs	10
2 Sentential Logic: Proofs	17
2.1 Primitive Rules of Proof	17
2.2 Sequents and Derived Rules	27
2.3 Theorems	33
3 Sentential Logic: Truth Tables	37
3.1 Truth Tables for Sentences	37
3.2 Truth Tables for Sequents	40
3.3 Tautologies	42
3.4 Indirect Truth Tables	44
3.5 English Counterexamples	47
4 Predicate Logic: Formal Language	51
4.1 A Formal Language for Predicate Logic	51
4.2 Translation of English to Quantified Wffs	58
5 Predicate Logic: Proofs	65
5.1 Primitive Rules of Proof	65
5.2 Theorems and Derived Rules of Proof	73

6	Predicate Logic: Models	77
6.1	Finite Interpretations and Expansions with One-Place Predicates	77
6.2	Finite Countermodels for Arguments with One-Place Predicates	81
6.3	Finite Countermodels for Arguments with Many-Place Predicates	84
6.4	Infinite Countermodels	88
7	Predicate Logic with Identity	91
7.1	Formal Language	91
7.2	Proofs	95
7.3	Countermodels	98
A	Appendix: Answers to Selected Exercises	101
A.1	Chapter 1 Answers	101
A.2	Chapter 2 Answers	103
A.3	Chapter 3 Answers	127
A.4	Chapter 4 Answers	133
A.5	Chapter 5 Answers	139
A.6	Chapter 6 Answers	150
A.7	Chapter 7 Answers	154
